

Formatting Guidelines for Project Proposal and Final Report

These guidelines outline the recommended font styles, heading formats, and layout standards for students preparing project proposals and final reports in BICT Software Engineering or ICT-related disciplines.

1. Font Type

- Main Font: Times New Roman or Arial
- Use the same font throughout the document (except for code snippets).

2. Font Size and Style

- Main Body Text: 11 pt, Regular
- Chapter Titles: 14 pt, Bold, UPPERCASE
- Section Headings: 12 pt, Bold
- Subsections: 12 pt, Bold
- Captions (figures/tables): 11 pt, Italic
- Footnotes / Endnotes: 10 pt, Regular
- Code / Technical Text: 10 or 11 pt, Monospace font (e.g., Consolas or Courier New)

3. Heading Numbering Style

Use a decimal multilevel numbering system for sections. Example:

Chapter 1: Introduction

1.1 Background

1.2 Problem Statement

Chapter 2: Literature Review

2.1 Existing Systems

2.2 Gap Analysis

Use MS Word's multilevel heading feature for consistency.

4. Line Spacing

- Use 1.5 spacing throughout.
- Leave 12pt space before headings and 6pt after (optional for readability).

5. Margins

- Top, Bottom, Left, right: 1 inch (2.54 cm)

6. Alignment

- Text: Justified
- Headings: Left-aligned
- Tables/Figures: Centered

7. Page Numbering

- Use Roman numerals (i, ii, iii...) for preliminary sections (e.g., Acknowledgements, TOC).
- Use Arabic numerals (1, 2, 3...) starting from Chapter 1.
